

Discover Your Water's Journey

Join us for a tour of the Camrosa Water District and see
how your water is brought to you.

February 12, 2025

8 a.m. - Noon

Learn about the diverse portfolio of water sources and their many different uses throughout the District.

Discover how the water reclamation facility operates.

Explore the distribution system, infrastructure, and various treatment facilities and processes.

CAMROSA WATER DISTRICT

BUILDING WATER SELF-RELIANCE

Camrosa has invested more than \$40 million in ratepayer funds over the last 25 years to **build self-reliance** and **reduce dependence** on imported water.

What does that mean? And what do our facilities actually do?

You'll see our brackish groundwater desalination facility, wastewater treatment plant, Conejo Creek diversion, and the new groundwater treatment plant at the Conejo Wellfield.

Camrosa staff will provide updates on the latest regulations and legislation putting pressure on California's water systems and learn how Camrosa is adapting to those changes to ensure we continue delivering water that is safe, reliable, and affordable.

SCHEDULE
